## About NetMission.Asia

NetMission.Asia is a network of passionate youth in the Asia Pacific region dedicated to engage and empower youth on **Internet governance** discourse with the aim to enhance youth mobility and create an impact in Asia.

Supported by DotAsia Organisation, NetMission.Asia was established in 2009, with students from tertiary institutes and universities recruited every year and for a series of training workshops, the **NetMission Academy**.

Through the Academy, we develop a network of NetMission ambassadors and alumni, who endeavor to organize their own **youth-led initiatives** to inspire more youth to be involved in Internet policy. NetMission.Asia provides a platform for young Asians with shared interests on Internet issues to connect, advocate and channel their ideas into **global policy dialogue**.
