

HERDSA (Hong Kong)
Awards for Student Projects

Redesigning Student Learning Experience in Higher Education

BACKGROUND

The HERDSA (Hong Kong Branch) was established in 1997 as a local chapter of HERDSA (Higher Education Research and Development Society of Australasia) which is a scholarly society based in Australia for people committed to the advancement of higher and tertiary education.

According to research and observation of higher education practitioners, if higher education aims to provide students with meaningful and relevant learning experiences, the existing learning arrangements may need to change considerably. To celebrate the 20th Anniversary of HERDSA Hong Kong Branch, we would like to invite students to conduct projects on this area to inform us their needs, their ideas and views on optimal arrangements of university education processes.

Up to **eight awards** on Redesigning Student Learning Experience in Higher Education will be provided for open competition. The selected teams will be invited to share their experience and ideas in the Symposium on Redesigning Student Learning Experience in Higher Education in August 2017.

Please refer to our homepage for details:
